

MATH OLYMPIAD
PROGRAMME 2022

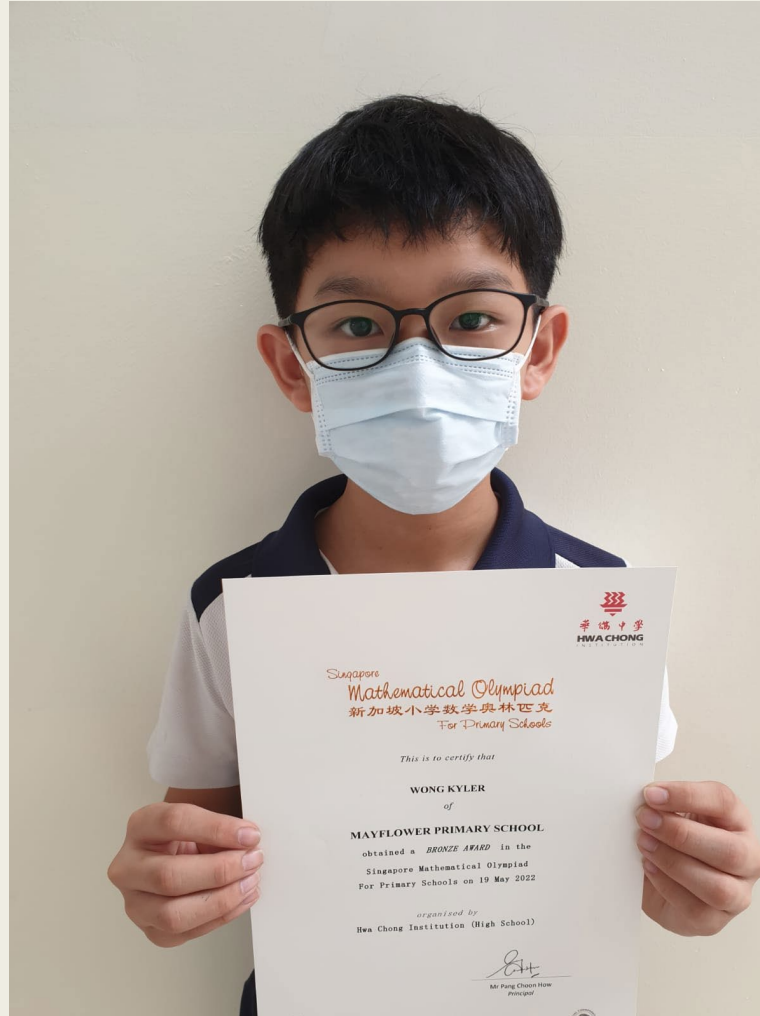

The Math Olympiad Programme generates interest in Mathematics among selected Primary School students and sharpens their problem solving skills.

The students are put through intensive after-school training sessions before they participate in a series of rigorous competitions.

Our P6 students have exemplified resilience and commitment to excellence despite fatigue from juggling conflicting assignments and assessments. More importantly, they learn to strive for accuracy in their daily work through this programme.

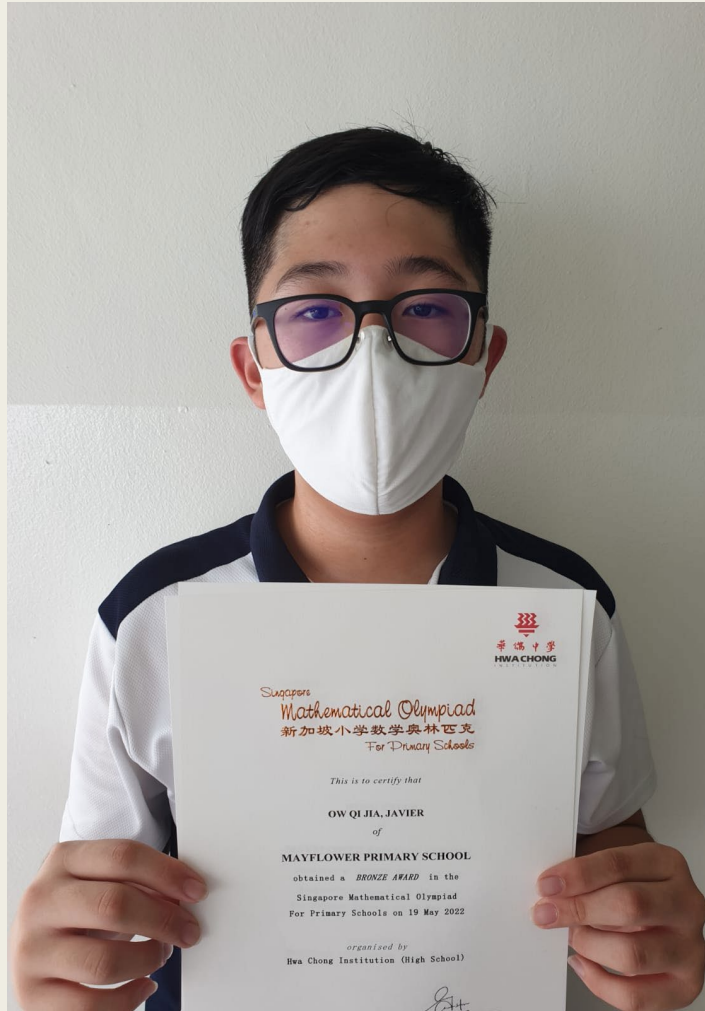

We are proud to share our prize winners from the Singapore Mathematical Olympiad for Primary Schools 2022 organised by Hwa Chong Institution.

Bronze Award

WONG KYLER (6 INTEGRITY)
